PROFESSIONAL SUMMARY

- Experienced Frontend and Backend Developer with over 2 years of expertise in Java, Springboot, Javascript, ReactJs, NextJs and Typescript and over 8 years of experience in the tech industry.
- Passionate about collaboration and innovation, aiming to enhance operational efficiency and deliver high-quality codes.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript
- **Development Frameworks:** SpringBoot, Django, ReactJs, NextJs, Flask, Vite
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Technologies:** Rest API's, Postman, Maven, Test Driven Development (TDD), Git, GitHub, HTML, CSS, Tailwind, Redux, CI/CD, GitHub Actions, Jest, Redux-persist

PROFESSIONAL EXPERIENCE

Oj Santos / Law & Visas - Fullstack Engineer

November – till date

- Proficient in using WordPress and Elementor Pro to build and integrate both frontend and backend components.
- Experienced in working with Astra themes to create visually appealing and functional websites.
- Skilled in calling and integrating various APIs within WordPress to enhance website functionality.
- Ensured websites are fully responsive and optimized for both PC and mobile devices, while also implementing SEO best practices.

Enum - Frontend Developer (Intern)

August – October 2024

- Developed frontend code using Next.js and TypeScript, enhancing user interface performance.
- Utilized Tailwind CSS for streamlined and responsive designs.
- Implemented several Figma design pages, translating visual concepts into functional code.
- Wrote Jest tests for thorough code validation, ensuring robust and bug-free code.
- Collaborated with team members to improve overall frontend practices and code quality.

Semicolon Africa - Software Engineer Trainee

Sep. 2023 – August 2024

- Gained comprehensive knowledge in both backend and frontend development.
- Built RESTful APIs using Java Spring Boot to enable efficient and scalable server-side operations.
- Developed frontend designs with React, HTML5, CSS3, and Tailwind, ensuring responsive and visually appealing user interfaces.
- Learned and implemented CI/CD practices, deploying applications using Render, Heroku, and GitHub Actions.
- Worked with various databases, including PostgreSQL, MySQL, and MongoDB, for efficient data management and storage.
- Wrote unit tests and integration tests respecting TDD with JUnit, resulting in faster development cycles.
- Documented APIs using Postman to ensure clear and comprehensive API documentation.

Avila Naturalle – Graphics Designer

February – October 2022

- Utilized CorelDRAW and Adobe Photoshop to create visually appealing graphics for various digital and print media.
- Designed realistic mockups to effectively showcase product concepts and branding ideas.
- Ensured all designs were pixel-perfect and aligned with the overall design strategy and client expectations.

Promasidor – Web Developer

March 2020 – Dec. 2021

- Ensured the stability and functionality of the office's web applications by regularly updating and debugging the code.
- Focused on frontend development, utilizing HTML and CSS to create visually appealing and user-friendly interfaces.
- Redesigned and improved the frontend layout and design, enhancing the overall user experience and visual appeal.
- Integrated various endpoints to fetch and display data dynamically, ensuring seamless communication between the frontend and backend.

EDUCATION

- | | |
|---|-------------------------|
| • Semicolon Africa
<i>Software Engineer</i> | 2023 – 2024 |
| • Henley Business School, UK
<i>Diploma in Business Education</i> | 2024 |
| • Yaba College of Technology, Lagos
<i>Higher National Diploma (HND – in view) - Computer Science</i> | 2023 – till date |
| • Fablo Computer College
<i>Advanced Diploma in Desktop Publishing</i> | 2010 – 2011 |

PROJECTS

EaziRent (House Rental App) | *Java (Springboot), React, JavaScript, PostgreSQL* | [Live Dashboard](#)

- Collaboratively developed a rental platform with a team of developers, enabling users to check for apartments, search by area and price, and rent apartments.
- Integrated Paystack for seamless payment processing.
- Implemented Java Spring Boot security with JWT tokens to ensure secure access control.
- Used GitHub Actions for CI/CD to streamline deployment and collaboration.

Jumia (E-Commerce App) | *NextJs, TypeScript, Tailwind, Sanity, Stripe, Firebase, Redux* | [Live Dashboard](#)

- Developed an e-commerce platform, utilizing TypeScript and Tailwind CSS for frontend development, and Sanity for content management.
- Used Firebase for authentication and user data storage.
- Integrated Stripe as the backend to add products and handle payment processing.
- Implemented Google Authentication for easy sign-in.

Dee Logistics (Items Delivery App) | *Java (Springboot), React, JavaScript, MySQL* | [Live Dashboard](#)

- Developed a logistics app that enables users to order riders for pickup and delivery of dispatches or orders, ensuring efficient and reliable service.
